Don't Wait: Live Longer, Better Lives through Proactive Care

Undergoing even successful medical procedures is still a risk – so why not do everything possible *today* to avoid needing unnecessary procedures later? That's the science we trust and one of our most urgent messages to our patients and community: Don't wait. Don't be reactive. Be **RESTORATIVE**.

We know not to wait until our car breaks down; keeping up with maintenance, regular oil changes, and tune-ups is imperative. Yet we do so much better with our cars than with care for our own health. We can't trade ourselves in for a newer model; we get one body in this life, and it needs upkeep and care. The Fraum Restorative Center is where you turn to keep it running, efficient and avoid crisis where possible.

This isn't being accomplished through traditional medicine. The American health care system is designed for reactive care with no option in most cases for proactive treatment. Combined with over medication, we're now seeing the results in a decline of health, like greater numbers of patients with severe diagnoses such as dementia – a pattern of escalating opiate doses leading to progressing dementia prognosis and more. We believe we can interrupt that process with the course of care through a patient's life as we work to prevent worsening disease and promote health.

At Fraum, we focus less on the cause of illness and more on the cause of health. We believe in helping you avoid unnecessary medical treatments by giving your body's restorative systems the tools to do what needs to be done, and to do it better.

Why spend more time undergoing medical treatments than you need to? There's too much life to live! Our passion and mission is to give you a greater chance to live it...and love it!

Dr. Brad E. Fraum D.C.
