## March 2023

### *Listening & Saving Lives*

*One patient's story of Healthcare Advocacy, unicorns, and how the experts at Fraum are "always listening."*

Global Healthcare Advocacy is gaining attention at Fraum and throughout the medical community. Rather than taking our word for it, the real impact can only be fully appreciated from the perspective of our clients.

#### Case Study:

Jennifer has long been a chiropractic patient for wellness and injury after surviving a terrible head-on collision which injured her neck and back. "As a wellness patient of Dr. Fraum's," Jennifer shares, "I was adjusted twice a week and in this kind of care, your chiropractor gets to know and understand what's going on with you to the point of being able to tell when something else is wrong."

"Dr. Fraum could see my decline, exhaustion, and weakness, and suggested I have an appointment with Dr. H., explaining she sees things through a different lens of both western medicine and chiropractic. She is a unicorn."

In Jennifer's case, this approach to care would prove lifesaving. She'd been deteriorating with severe cold and flu symptoms but like many moms, she kept pushing through until a text exchange with Dr. H. advised her to "go to the ER immediately" for a presumed case of pneumonia.

"I listened and headed to the ER where I was diagnosed with pneumonia, walked to the ambulance unassisted to be transferred to a facility with an open bed, and after we made a right turn, I don't recall anything until waking up 6 days later."

Jennifer was put on a ventilator to save her life, spent weeks in ICU and rehab, and credits not only Dr. H.'s knowledgeable diagnosis, but the Fraum Center's relational care saying, "I trust them implicitly and I don't say that lightly. They are always listening. What you may think is an irrelevant detail, could be the very thing that could change – or even save your life." The Fraum Team is here for you; ready to support you wholly in your journey to optimal health.

Live the life you love,

*Dr. Brad E. Fraum D.C.*
