There's a Better Way

"If you're considering joint or knee replacement surgery..." we often say to potential patients, "talk to us first. There's a better way."

Beyond those "considering" surgery, are a whole faction of hurting people definitively NOT considering surgery, avoiding it at all costs for a variety of important reasons. Usually, people who fall into that category think they're out of luck and their only option is to live in pain, which only gets worse. We want to talk to you, maybe most of all.

What if there was a way for you to help your body regenerate cartilage and tissue in your joints? Few know about the benefits of restorative medicine and the growing, exclusive treatment options available at the Fraum Center for Restorative Health.

We began treating degenerative joint issues on Hilton Head in 1991 and more recently have begun offering new and highly sought-after therapies. Western medicine has been treating joint restoration the same way for 55 years. You read that correctly. With all the world's medical advances, nothing has changed in joint therapy since the 60s.

Meanwhile, celebrities, athletes, and others have been flying to destinations like Germany and Panama to get advanced restorative medicine therapy. For the last five years at Fraum, we have helped thousands get their life back through the exact technology that is sought after worldwide.

If you'd like to learn more, join us at our free weekly presentations, open to the community and visitors, on restorative medicine that is Beyond Stem Cells™. Find out about our events by visiting our website at Fraum.com and be sure to follow us on facebook.com/Fraum.Chiropractic or [@fraumcenter](https://instagram.com/@fraumcenter) on Instagram.

Live the life you love,

Dr. Brad E. Fraum D.C.
