We Can Fix This

Introducing the DRX9000® - Exclusive Advanced Technology Producing Advanced Results

That's something patients are used to hearing at the Fraum Center for Restorative Health. They're also used to this promise being fulfilled, and now even more-so with the introduction of new advanced technology.

Not only new, but exclusive as the Fraum Center is the only office in the area FDA cleared to have the DRX9000® machine in practice. The results are staggering, reporting "positive results in excess of 90% of our patients, and depending on the need or case, several patients experience a difference the first time they're on the machine."

The DRX9000® gently decompresses your spine, helping relieve pressure and produce effective, quicker healing of back pain due to herniated and degenerated discs and beyond, all through this NON-SURGICAL SPINAL DECOMPRESSION.

It's not just a claim, it's the consistent testimony of our Fraum patients like Geoffrey from Sea Pines who experienced intense sciatic pain. "I had heard good things about Dr. Fraum so I came to him for decompression and injections in my back. It's been about a year and I'm good as new. I'm able to garden, cycle, run – none of which I could do 14 months ago." "If you're considering it," says another patient, Stuart – or if you're curious at all, "don't hesitate. It really is a miracle."

"If we can allow our body to heal naturally," Dr. Fraum encourages, "without surgery or unnecessary medication, that's a win for everybody and it's great to get back to experiencing the activities of life that we've been missing out on."

Live the life you love,

Dr. Brad E. Fraum D.C.
