The Future is Now – Bio Restoration

The next big revolution in evolution is happening now in healthcare and with Bio Regeneration at the Fraum Center for Restorative Health, we're integrating the highest level of care with the top providers. Using evidence-based diagnostics and therapeutics, our team can meet all your needs with treatments performed by highly trained and experienced doctors.

Our vision is to be the world leader in optimizing health and longevity, helping people live better longer today by introducing "youthful" restorative substances into the body to rejuvenate existing cells, allowing the body to age more gracefully and even reverse some effects of the aging process.

As we age, our cells get sick and die. When a cell dies, it creates a cascade of events, leading to inflammation and disease that can decrease our lifespan. A recent study published evidence that delaying and reversing aging in cells is feasible and positive changes drive anti-aging.

Through regenerative therapy, we move the paradigm from traditional life expectancy to maximizing, not our calendar age, but rather empowering our biological age exponentially. The benefits of Restorative Therapies for aging include but are not limited to:

1. Improved physical capacity
2. A decrease in pain
3. Increased strength, balance & overall mobility
4. Enhanced immune system
5. Improvement in vitality, rejuvenation, libido, and overall quality of life

Our team of committed health professionals are passionate about optimizing health by creating a nexus of technology, lifestyle, and biological therapies around our core values. Best of all it's all available on beautiful Hilton Head Island, SC.

Live the life you love,

Dr. Brad E. Fraum D.C.
